

Terms and Conditions of Use V1.3a 12/07/12

Thank you for booking the Whaley Bridge 3G pitch. Please ensure you read the following information. It is your responsibility to ensure every person playing in the booked period is made aware of this, and it is your responsibility to ensure that every person playing in your booked period complies with this.

Footwear: **Footwear must be absolutely clean.**

Allowed - The preferred footwear is a boot with moulded rubber studs, but any screw in stud is fine as long as it is not metal or metal tipped. The studs should be less than 8mm long. Astroturf trainers with dimples will do, but are not the best for the surface. Ordinary flat trainers are not ideal for the surface either and should not be used unless you are aged 11 or below. For a fuller description of why some footwear is allowed and some is not, see the SafePlay document on the whaleybbridge.com website. You can injure yourself on any surface- read the SafePlay information , play safely and learn yourself how the surface plays in all weathers before playing competitively on it , in order to try to avoid injuries. If in doubt ask the person who booked the session.

Not Allowed - No blades on boots ,or any metal tipped or metal studs should be used. The correct footwear is vital to protect the surface from damage. Occasional inspections of footwear will take place, and any users found with incorrect footwear must leave the surface and will not be refunded for the session.

Please mark cheques on the back with your name and details of your booking.

Care of the surface: Please help us by ensuring above anything else, that you are using the correct footwear and that it is clean. If you can do a quick sweep of the MUGA surface to remove any organic matter- leaves, mud,stones,seeds or any other debris before playing, we would be really grateful. Contamination and incorrect footwear are the biggest problem for a 3G pitch. If you see a problem with the surface please let us know. Please do not take drinks or food onto the surface and ensure the gate is locked when you finish.
